

ACCROPODE™ technology sublicensing

ARTELIA Eau & Environnement as Licensor has granted an exclusive licence to CLI (Concrete Layer Innovations) to represent the proprietary ACCROPODE™ technology and to award sublicenses to third parties in the territory where the project is located.

All tendering contractors are invited to obtain the conditions for the use of the ACCROPODE™ technology (rights and technical assistance) from CLI before starting this specific application.

CLI will grant the sub-license to the Contractor who will be awarded the marine works involving ACCROPODE™, upon review of the project design.

Design and works regarding ACCROPODE™ such as materials, fabrication, transportation, and placement shall meet the CLI specifications and recommendations.

CLI can be contacted at the following address:
